

Changes in Korean Travel Behavior Before and After COVID-19 (2019–2024)

Dataset Collected and Curated by ConsumerInsight INC., located in Seoul, Republic of Korea

About the Dataset

This dataset is part of the **Travel Behavior & Planning Study**, one of ConsumerInsight's five syndicated studies on South Korean travelers. Conducted annually since **2015** with approximately **2,000 to 2,500 respondents per month (500 per week)**, the study aims to provide data to support the establishment, implementation, and evaluation of consistent tourism activation strategies by examining recent travel experiences and evaluations, as well as measuring future plans and intentions.

Data Sampling

The dataset for the study, Changes in Korean Travel Behavior Before and After COVID-19 (2019–2024), consists of aggregated response distributions rather than raw, individual-level data. Derived from the Travel Behavior & Planning Study, it provides annual and monthly response ratios for each survey item. This dataset summarizes key trends among South Korean travelers, enabling a longitudinal comparison across the six-year period and providing insights into behavioral changes before and after COVID-19.

Travel Corona Index (TCI)

The Travel Corona Index (TCI) is an indicator designed to compare post-COVID-19 results with pre-pandemic levels. It is calculated by dividing the result of a given month by the corresponding month's result from 2019 (the year before COVID-19) and multiplying by 100

$$\text{TCI} = (\text{Result for the given month} \div \text{Result for the same month in 2019}) \times 100$$

This index allows for longitudinal comparison and analysis of monthly changes in travel behavior.

Data Contents

The dataset includes the following information:

1. Domestic Travel

- ① Domestic Travel Experience
- ② Domestic Travel Planning

2. Overseas Travel

- ① Overseas Travel Experience
- ② Overseas Travel Planning

* **Respondent Criteria:** Nationwide men and women aged 20 to 69

* **Sample Size:** 2,000 to 2,500 respondents per month (500 per week)

* **Survey Period:** From January 2019 to December 2024
